AM POLYMERS GmbH is an up-coming start-up in the field of 3D printing, founded in 2014. The focus of the activities is on powder production and plastics processing using laser sintering. For these processes, we develop, produce and distribute outstanding plastic powders such as polypropylene, polyethylene, PBT, TPU, polyamides and other materials.

Our team wants to grow and now needs reinforcement: If you want to help shape your job and your environment, like flat hierarchies and want to have an influence on the success of our company project with your work in a start-up, then you have come to the right place.

We are looking for a full-time Production Technician (m/f/d) for our location in Willich as soon as possible.

### Job Description

Your range of tasks includes:

1. You will be responsible for setting up and operating laser sintering production and laboratory machines, including material preparation, process preparation and post-processing of components
2. The production of plastic compounds and plastic powders and the operation of the necessary manufacturing machines is part of your task
3. You carry out material testing, quality control and maintenance work
4. You prepare the shipment of goods and pack pallets and boxes

### Your profile

You have experience in:

1. production and palletizing
2. technical understanding and knowledge of basic processes
3. High flexibility
4. High willingness to learn and ability to work in a team
5. Willingness to do physical work, high resilience and diligence
6. Basic knowledge of PC and MS Office

It would also be desirable to have knowledge in the field of plastics processing and a forklift driver's license.
